

SPRAY URKI-DRY
SANDING CONTROL

APPLICATION

SPRAY URKI-DRY it is an easy-sanding black acrylic paint used as a sanding guide in spray to achieve a smooth and flawless surface. With very short drying time and avoiding the sagging of the sandpaper.

SURFACE PREPARATION

To apply on light colored surfaces (primer, putty and filler), it allows the detection of superficial defects (pores, orange peel) and facilitates the preparation in the sanding process to obtain a good finish. Suitable for dry and wet sanding processes.

APPLICATION INSTRUCTIONS

Shake the can during 2-3 minutes before use the SPRAY URKI-DRY

Apply 1 layer leaving to dry before each sanding operation.

After use, turn upside down the can and clean the valve

Painting range
20-30 cm

1 spraying layer

Dry 5 min.
